

Digital Access Statement

Robert Softley Gale - June 2021

Communication: preferences and requirements

- I am happy with all forms of communication: email; phone; video call; text message and WhatsApp.
- I have a speech impairment so prefer video calls over voice calls, as this allows for more non-verbal communication.
- I may respond to communications out with working hours because of the nature of my working patterns but I do not expect this of anyone else.

Physical and environmental factors

- I am a wheelchair user so when attending events I require level access (ramps, lifts, etc) and doorways wide enough for a standard wheelchair.
- Large events in rooms with poor acoustics are difficult for me as others find it very challenging to understand what I am saying.

Attending online or digital events

- I do not have any access requirements that relate to attending online or digital events.
